

SS Unlimited, LLC

INFRASTRUCTURE BUILT FROM THE GROUND UP

DESIGN → BUILD → AUTOMATE → MONITOR → MANAGE | End-to-end network and infrastructure engineering for organizations that need reliable systems without adding another full internal infrastructure team.

12+

Years IT experience

50+

Routers deployed nationwide

2,000+

Users supported at live events

99.5%+

Reported uptime across venues

WHAT WE BUILD & SUPPORT

- **Ground-Up Infrastructure** - architecture, routing, switching, VLANs, wireless, firewalls, VPNs, servers, cloud connectivity and production deployment.
- **Network Modernization** - upgrades, migrations, segmentation, multi-site connectivity and replacement of aging or fragmented infrastructure.
- **Wireless Infrastructure** - enterprise Wi-Fi for offices, high-density environments and mobile/event operations.
- **Monitoring & Observability** - health monitoring, alerting, dashboards, operational visibility and response workflows.
- **Infrastructure Automation** - Python, Ansible, PowerShell, APIs, webhooks and Docker-based tooling that reduces repetitive operations.
- **Ongoing Infrastructure Management** - monitoring, configuration support, patching, troubleshooting, documentation and lifecycle support.

WHY SS UNLIMITED

- **One partner across the lifecycle:** design through ongoing operations.
- **Multi-vendor engineering:** networking, wireless, security, cloud, systems and automation.
- **Production experience:** infrastructure supporting nationwide live environments and thousands of users.
- **Documentation-first:** configuration exports, source code and operational documentation are part of delivery.

ENGAGEMENT OPTIONS

Network Monitoring

Starting at \$1,500/month

Monitoring, alerting, health visibility and operational reporting.

Full Network Management

Starting at \$3,500/month

Ongoing network operations, configuration support, troubleshooting, maintenance and documentation.

Infrastructure Automation

Projects typically starting at \$4,000

Automation, API integrations, operational tooling and workflow improvements.

Monitoring & Observability

Projects typically starting at \$5,000

Monitoring platforms, dashboards, alert pipelines and infrastructure visibility.

Ground-Up Builds & Modernization

Custom scope

Greenfield infrastructure, network refreshes, migrations, wireless and multi-site projects.

Full-Stack Infrastructure

Custom pricing

Broader ownership spanning network, systems, cloud connectivity, monitoring and automation.

TECHNOLOGY EXPERIENCE

Networking: MikroTik, Ruckus SmartZone, Cisco, Cradlepoint, FortiGate, SonicWall, Aruba EdgeConnect, SD-WAN

Automation: Python, Ansible, PowerShell, Bash, REST APIs, Webhooks, Git, IaC

Systems/Cloud: AWS, Microsoft 365, Azure AD, Active Directory, Windows Server, Linux, VMware, Hyper-V, Docker

Monitoring: SolarWinds, Nagios, Grafana, SCCM, ServiceNow

READY TO DISCUSS YOUR INFRASTRUCTURE?

Tell us what you are building, replacing, scaling or struggling to operate. We can help define the scope and the right engagement.
