12+

Years IT experience

50+

Routers deployed nationwide

2,000+

Users supported at live events

99.5%+

Reported uptime across venues

CORE COMPETENCIES

- **Network Engineering & Deployment** - greenfield builds, routing, switching, VLANs, segmentation, multi-site connectivity, infrastructure modernization and migrations.
- **Wireless Infrastructure** - enterprise Wi-Fi design and deployment for high-density and mobile environments using Ruckus, MikroTik and modern wireless platforms.
- **Network Operations & Monitoring** - monitoring, alerting, dashboards, health checks, incident response support, patching and defined operational processes.
- **Automation & Integration** - Python, Ansible, PowerShell, REST APIs, webhooks, Infrastructure-as-Code, operational bots and workflow automation.
- **Secure Connectivity** - firewalls, VPNs, site-to-site connectivity, WireGuard, Tailscale and secure remote-access architecture.
- **Cloud, Server & Platform Infrastructure** - AWS, Docker, Windows/Linux servers, Microsoft 365, Active Directory, virtualization, PostgreSQL and Grafana.

DIFFERENTIATORS

- **End-to-end ownership:** architecture through deployment, documentation, automation, monitoring and sustainment.
- **Production-tested experience:** infrastructure supporting nationwide live cybersecurity training environments and thousands of users.
- **Multi-vendor capability:** engineering across networking, wireless, security, systems, cloud and automation platforms.
- **Flexible engagement:** direct projects, subcontracting, teaming, task-order support and ongoing managed services.
- **Documentation-first delivery:** clients receive configuration exports, source code and operational documentation.

REPRESENTATIVE EXPERIENCE

Nationwide Cybersecurity Training Infrastructure

Engineering and operational support for live cybersecurity training environments, including 50+ MikroTik routers, Ruckus wireless systems, AWS-connected infrastructure and support for 2,000+ users across venues.

Enterprise Infrastructure Administration

Experience supporting healthcare, government, defense and nonprofit environments with Active Directory, Microsoft 365, SCCM, endpoint patching, firewalls, VPNs, virtualization and monitoring platforms.

Infrastructure Automation

Development of Python/API-based tooling, alert enrichment, monitoring integrations, Docker application stacks and operational workflows designed to reduce manual effort and improve visibility.

TECHNOLOGY EXPERIENCE

Networking: MikroTik, Ruckus SmartZone, Cisco, Cradlepoint, FortiGate, Dell SonicWall, Aruba EdgeConnect, SD-WAN

Automation: Python, Ansible, PowerShell, Bash, REST APIs, Webhooks, Git, IaC

Systems/Cloud: AWS, Microsoft 365, Azure AD, Active Directory, Windows Server, Linux, VMware ESXi, Hyper-V, Docker

Monitoring/Security: SolarWinds, Nagios, Grafana, Wireshark, Nmap, Nexpose, SCCM, ServiceNow

CONTRACTING PROFILE

Primary NAICS: 541512 - Computer Systems Design Services

Additional NAICS: 541511, 541513, 541519, 541690, 611420

Business Status: Maryland LLC; SAM.gov Active; Small Disadvantaged Business; Maryland Certified Small Business

Service Area: Maryland, Washington DC, Virginia and remote/nationwide support as scope permits
